See you at SEMICON Europa!

We are pleased to announce that this year we will be attending SEMICON Europa, which will be held in **Messe München from 12 to 15 November, in Hall B1 – Booth 576.**

We will present one of our flagships, the **SCT 1000**. It is a supercontinuum fibre-optic laser, with an emission wavelength between 450 nm and 2400 nm, characterized by a high power in the visible range and excellent stability.

At SEMICON you can also see our new versatile laser **LFC 1500 X**, used to demonstrate the technique invented by CERN, the TPA-TCT. It is a laser made up of 3 modules that allow to select the repetition rate from single shot up to 10 MHz, the pulse energy in the range 10 pj – 10 nj and the pulsewidth between 60 fs and 250 fs.

In our stand, you can meet our Sales Engineer, **Gaia Sardiello** (gsardiello@fyla.com), and the Sales Manager, **Paulius Naujalis** (pnaujalis@fyla.com), who can also give you more information about our product.
